Surgical Forum XLII

Authors who have an asterisk (*) or a dagger (†) after their names are recipients of American College of Surgeons Fellowships or American College of Surgeons Scholarships, respectively.

Chapter 1—Nutrition

Glutamine Protects the Liver Following Corynebacterium Parvum/ Endotoxin-Induced Hepatic Necrosis 1
Roy W. Hong, MD, Malcolm K. Robinson, MD, Jan D. Rounds, BS, and Douglas W. Wilmore, MD, FACS

Inhibition of Prolactin Secretion Reduces the T Cell Immunostimulatory Effects of Arginine 3
Stephen J. Kirk, MB, FRSC(I), Mark C. Regan, MB, FRCS(I), Hannah L. Wasserkrug, BA, and Adrian Barbul, MD, FACS

Arginine Supplementation Improves Fibrinogen and Hepatic Protein Synthesis After Surgical Trauma 5
Pablo León, MD, H. Paul Redmond, FRCS(I), Jian Shou, MD, Cathal J. Kelly, FRCS(I), Margaret D. Schluter, BS, T. Peter Stein, PhD, and John M. Daly, MD, FACS

Adaptation to a Fish Oil Diet Prevents Sepsis-Induced Fatty Infiltration of the Liver 7
Cynthia Smyth, BS, Alma Tabares, BS, Francis E. Rosato, MD, FASC, and Susan Lanza-Jacoby, PhD

The Impact of Dietary Fish Oil in Endotoxin-Induced Stress 9
John A. Griswold, MD, James B. Grogan, PhD, Joseph Metcalf, MD, Jacqueline G. White, MD, and Robert S. Rhodes, MD, FACS

The Effect of Enteral Feeding on Catecholamine Response Following Trauma 11
H. A. Poret III, MD, Kenneth A. Kudsk, MD, FACS, Martin A. Croce, MD, Timothy C. Fabian, MD, FACS, Gayle Minard, MD, Paige R. Collier, RD, Rex O. Brown, PharmD, and Roger S. Cicala, MD

Glucose Metabolism and Hormone Treatment in Cancer Cachexia ... 14
David L. Bartlett, MD, Scott L. Charland, PharmD, and Michael H. Torosian, MD, FACS

Does Glutamine Facilitate Chemotherapy While Reducing Its Toxicity? 16
V. Suzanne Klimberg, MD, Emmanuel Nwokedi, BS, Laura F. Hutchins, MD, Alex P. Pappas, MD, Nicholas P. Lang, MD, J. Ralph Broadwater, MD, Raymond C. Read, MD, and Kent C. Westbrook, MD

L-Glutamine Blocks Essential Fatty Acid-Induced Desensitization of Both Pancreatic Alpha and Beta Cell Response to Glucose 18
Emmanuel C. Opara, PhD, Marc Garfinkel, BA, Warner M. Burch, MD, and Onyc E. Akwari, MD, FRCSC, FACS

Cellular Injury and Decreased mRNA for Myofibrillar Proteins: Potential Role of Intracellular Glutamine as Mediator 21
Yuman Fong, MD, Joseph Minei, MD, Michael A. Marano, MD, Lyle L. Moldawer, PhD, He Wei, MD, G. Tom Shires III, MD, FACS, G. Tom Shires, MD, FACS, and Stephen F. Lowry, MD, FACS

The Metabolic Effects of a Continuous Infusion of Insulin-like Growth Factor (IGF-1) in Parenterally Fed Men 23
William A. Thompson, MD, Susette M. Coyle, RN, Douglas Lazarus, PhD, Eva Fisher, MD, Kimberly Van Zee, MD, Craig Rock, MD, Lyle L. Moldawer, PhD, and Stephen F. Lowry, MD, FACS

Prolonged Fasting, Dietary Protein Restriction, or Lack of Thyroid Hormones Suppresses Lysosomal and ATP-Dependent Proteolytic Processes in Muscle 25
Nicholas E. Tawa, Jr., MD, PhD, and Alfred L. Goldberg, PhD

Chapter II—Critical Care

Full Restoration of Donor Liver ATP Depleted During Cold Ischemic Storage Requires Supplementation with Adenosine 29
John D. Palombo, DSc, John L. Bowers, PhD, R. Armour Forse, MD, PhD, FACS, FRCSC, Bruce R. Bistrian, MD, PhD, G. Blackburn, MD, PhD, and Melvin E. Clouse, MD

Antamanide Reduces Hind-Limb Ischemia-Induced Neutrophil Sequestration and Lung Permeability 32
Thomas Lindsay, MD, James Hill, MB, ChB, Mark Wiles, David Shepro, PhD, and Herbert B. Hechtman, MD

Glucocorticoids Enhance Acute Phase Protein Synthesis in a Kupffer Cell-Hepatocyte Coculture Model 34
Paul H. Kispert, MD

Cardiac Pacing to Improve Hypothermic Low Output State: Is It Appropriate? 36
Chris Oung, MD, D. Shum-Tim, MD, Ray C.-J. Chiu, MD, FACS, and E. John Hinchey, MD, FACS

Mesenteric Hypoperfusion and Decreased Mucosal ATP in Porcine Endotoxicosis 39
Anne C. Mosenthal, MD, Hailong Wang, MD, Janice M. BelleIsle, BS, Randa E. Adamo, MD, Yan-Min Li, MD, Michael E. Youssef, MD, David Gang, MD, Andrew T. Canada, PhD, and Mitchell P. Fink, MD, FACS

Mesenteric Macrocirculatory and Microcirculatory Responses to Increased Intra-Abdominal Pressure 41
Lawrence N. Diebel, MD, Scott A. Dulchavsky, MD, and Robert F. Wilson, MD

Microvascular Hyperperfusion Occurs in the Liver, Kidney, and Spleen During Early Sepsis 43
Ping Wang, MD, Mian Zhou, MD, M. Waheed Rana, PhD, Zheng F. Ba, BS, and Irshad H. Chaudry, PhD

Low-Dose Dopamine in Resuscitation of Hemorrhagic Shock Ameliorates Lipid Peroxidation in the Liver and Kidney 46
Elias A. Zias, MD, John A. Savino, MD, FACS, Nanakram Agarwal, MD, FACS, and Vasilios Theofanopoulos, MS

Systemic Hemodynamics Estimate Changes in Gut Perfusion During Lung Injury Managed with Positive End-Expiratory Pressure (PEEP) 48
Peter N. Purcell, MD, Daniel J. Johnson, MD, Richard D. Branson, RRT, Kenneth Davis, Jr., MD, FACS, and James M. Hurst, MD, FACS

Prostaglandin E_1 Effects on Renal Reperfusion Injury in a Chronic Model 49
James T. Mayes, MD, Ann Robinson, BA, Ravi Masih, BA, Thanh-Truc Nguyen, BA, and James A. Schulak, MD, FACS

Low-Dose Endotoxin Infusion Causes Myocardial Depression by a Membrane-Dependent Process Distinct from Physiologic Down Regulation 51
John Bagley, MB, BS, FRCS(Ed), Mark J. Walsh, MSc, William Zhong, MD, George L. Blackburn, MD, PhD, FACS, and Robert Armour Forse, MD, PhD, FACS

A Hepatocyte Bioreactor as a Potential Bioartificial Liver: Demonstration of Prolonged Tissue-Specific Functions 54
Russell A. Shatford, MD, MPH, Scott L. Nyberg, MD, William D. Payne, MD, FACS, Wei-Shou Hu, PhD, and Frank B. Cerra, MD, FACS

Chapter III—Infection and Its Mediators

Hepatic Sinusoidal Blood Flow Is Increased in Hyperdynamic Sepsis 57
George T. Drugas, MD, Karen Chun, MD, David Ferguson, BA, James Biewer, BS, and Mark G. Clemens, PhD

Acute Response of Human Muscle Protein to Catabolic Hormones ... 60
Dennis C. Gore, MD, Farook Jahoor, PhD, and David N. Herndon, MD

The Effect of Peritoneal Sepsis on Hepatic Gene Expression and Hepatic Mitochondrial Long-Chain Fatty Acid Oxidation in Rats 62
Roderick A. Barke, MD, Paul S. Brady, PhD, and Linda J. Brady, PhD

Glutathione Depletion Enhances Bacterial Translocation and Alters Immunologic Status 65
Malcolm K. Robinson, MD, Roy W. Hong, MD, Jan D. Rounds, BS, Danny O. Jacobs, MD, and Douglas W. Wilmore, MD, FACS

The Relationship Between Malnutrition and Immune Competence in Preoperative Surgical Patients 68
Spiros A. Stergiopoulos, MD, Werner Haupt, MD, Harry M. Shizgal, MD, FRCSC, FACS, John Sampalis, PhD, and Nicholas V. Christou, MD, PhD, FRCSC, FACS

IL-1 Enhances H^+ Pump-Mediated Acid Extrusion by Peritoneal Macrophages (Møs) 70
Carol J. Swallow, MD, Sergio Grinstein, PhD, Rae A. Sudsbury, BSc, and Ori D. Rotstein, MD, MSc, FRCSC

Mixed Bacterial and Fungal Intraperitoneal Infections: Antibacterial Agents Alone Fail to Reduce Mortality 72
Reid B. Adams,† MD, Robert G. Sawyer, MD, Addison K. May, MD, Michael D. Spengler, BS, and Timothy L. Pruett, MD

In Vivo and In Vitro Humoral Immunity Following Thermal Injury 74
Richard G. Molloy, MB, FRCSI, Miriam Nestor, BSc, Kathryn H. Collins, BS, Inna Saporoschetz, BS, John A. Mannick, MD, FACS, and Mary L. Rodrick, PhD

Effect of Allogeneic Blood Transfusion on the Response to Acute and Chronic Sepsis 76
Cathal J. Kelly, FRCS(I), H. Paul Redmond, FRCS(I), Jian Shou, MD, Pablo León, MD, and John M. Daly, MD, FACS

Resistance to Bacterial Infection During Acute Pancreatitis 78
Luca Gianotti, MD, Rino Munda, MD, FACS, Joseph S. Solomkin, MD, FACS, Mark Weiss, MD, and J. Wesley Alexander, MD, ScD, FACS

Splenic Autotransplantation to Hepatic Parenchyma Alters Survival to Bacterial Challenge 82
Donald W. Moorman, MD, Douglas M. Evans, MD, Kimberly D. Stakleff, BSc, and Natalie L. Hawkins, BA

Hyperthermia Following the Intrahypothalamic Administration of Amylin 84
William T. Chance, PhD, Ambikaipakan Balasubramaniam, PhD, Fu-Schen Zhang, MD, and Josef E. Fischer, MD, FACS

Macrophage Inflammatory Protein 2 (MIP-2) Induces Neutrophil Margination and Enhanced Leukocyte Infiltration Into Wounds 87
Thomas J. Fahey III, MD, Barbara Sherry, PhD, William G. Jones, MD, G. Tom Shires, MD, Anthony Cerami, PhD, and Roger W. Yurt, MD

Glutathione Depletion Decreases Hepatocyte Nitric Oxide Synthesis in Response to Kupffer Cell Products 89
Brian G. Harbrecht, MD, Joseph Stadler, MD, Mauricio Di Silvio, MD, Vincent Chough, BS, Juan B. Ochoa, MD, Ronald D. Curran,† MD, Richard L. Simmons, MD, and Timothy R. Billiar,† MD

Early Effects of Cytokines on Skeletal Muscle Glutamine Metabolism 90
Thomas R. Austgen, MD, Paul S. Dudrick, MD, Mike K. Chen, MD, and Wiley W. Souba, MD, ScD, FACS

Interleukin-4 (IL-4) Prevents Mortality from Acute But Not Chronic Peritoneal Infection and Induces an Accelerated Tumor Necrosis Factor Alpha (TNF) Response 93
Robert G. Sawyer, MD, Reid B. Adams,† MD, Addison K. May, MD, Lynn K. Rosenlof, MD, Michael D. Spengler, MD, and Timothy L. Pruett, MD

Interleukin-1 (IL-1) Gene Expression and Tissue Injury During Lethal Endotoxemia: The Therapeutic Role of IL-1 Receptor Blockade 96
Gerard M. Doherty, MD, H. Richard Alexander, MD, Martha A. Zeigner, MD, Maria J. Merino, MD, and Jeffrey A. Norton, MD, FACS

Induction of Manganous Superoxide Dismutase (MnSOD) Gene Expression by Interleukin-1 (IL-1): Possible Molecular Basis for IL-1 Protection Against Experimental Sepsis 98
H. Richard Alexander, MD, J. Christian Jensen, MD, Gerard M. Doherty, MD, Mark I. Block, MD, Carolyn M. Buresh, BS, and Jeffrey A. Norton, MD, FACS

The Effects of Endotoxemia and Cytokines on Amino Acid Transport in Skeletal Muscle and the Possible Role of Glucocorticoids 101
Oded Zamir, MD, J. Howard James, PhD, Per-Olof Hasselgren, MD, PhD, FACS, Takashi Higashiguchi, MD, Janice A. Frederick, MD, and Josef E. Fischer, MD, FACS

Paired Combinations of Antibodies Against TNF, IL-6, and IFN-γ Protect Mice Against High-Dose LPS-Induced Mortality Better Than Single Anticytokine Antibodies 103
Anand Tewari, MD, Jian-Chao Zou, MD, Michael K. Pearce, BS, John S. Abrams, PhD, and H. Fletcher Starnes, Jr.,* MD

Steroids Attenuate Phospholipase A-2 Elaboration During Endotoxemia in Humans 105
Alfred A. Santos, MD, Marcus R. Scheltinga, MD, Elaine F. Brown, MS, Elizabeth A. Chambers, MS, Pornsi Lawton, Jeffrey L. Browning, PhD, and Douglas W. Wilmore, MD, FACS

Platelet-Activating Factor May Mediate Neutrophil Priming Following Clinical Burn or Blunt Trauma 108
John M. Pitman III, MD, Gail W. Thurman, BS, Benjamin O. Anderson, MD, Renato S. Pogetti, MD, David N. Nelson, MD, Charles E. Hartford, MD, Verlyn M. Peterson, MD, Lawrence L. Ketch, MD, Earnest E. Moore, MD, Alden H. Harken, MD, and Daniel R. Ambruso, MD

Lipopolysaccharide Uptake by Macrophages Is Enhanced by Anti-Lipopolysaccharide Monoclonal Antibodies 110
Jaime L. Mayoral, MD, Carolyn S. Cody, MD, Randall S. Burd, MD, Mark D. Sawyer, MD, Christopher S. Raymond, BA, and David L. Dunn, MD, PhD

Cytokines and the Development of T Cell Immunity During Infection with Listeria Monocytogenes 112
L. Michael Brunt, MD, and David L. Bond, BS

Chapter IV—Small Intestine, Liver, Pancreas, Stomach, and Biliary Tract

Selective Inhibition of Intestinal Glutaminase Activity in the Tumor-Bearing Rat 115
Rabih M. Salloum, MD, Harry S. Sitren, PhD, Kirby I. Bland, MD, FACS, Edward M. Copeland, MD, FACS, and Wiley W. Souba, MD, FACS

Early Detection of Small Intestinal Ischemia by Elevated Circulating Intestinal Fatty Acid Binding Protein (I-FABP) 118
Gerald Gollin, MD, and William H. Marks, MD, PhD

Small Bowel Origin and Calorie Dependence of a Signal for Meal-Induced Jejunal Absorption 120
Gary J. Anthone, MD, Marlene S. Orandle, BA, Michael J. Zinner, MD, FACS, and Charles J. Yeo, MD, FACS

Biliary and Pancreatic Obstruction Reduces Bowel Motility, Disrupts Intestinal Microflora, and Promotes Bacterial Translocation 122
Norbert S. Runkel, MD, Gregory S. Smith, MS, Liliana F. Rodriguez, BS, Ying Chen, MS, Thomas A. Miller, MD, FACS, and Frank G. Moody, MD, FACS

Peptide YY (PYY) and Neuropeptide Y (NPY) Reverse VIP Inhibition of Motility in Isolated Perfused Rabbit Ileum 124
David N. Armstrong, MD, ChM, FRCS, Garth H. Ballantyne, MD, FACS, and Irwin M. Modlin, MD, PhD, FRCS, FACS

The Effects of Nutrients on Mucosal Electrophysiology: Ileum vs. Jejunum 126
Stephanie A. Wishnev, MD, Mario A. Cardona, MD, Samuel D. Smith, MD, Richard L. Simmons, MD, and Marc I. Rowe, MD

Differential Trophic Effects of Neurotensin on Small Bowel Mucosa 128
Dai Chung, MD, B. Mark Evers, MD, Izumi Shimoda, MD, Courney M. Townsend, Jr., MD, FACS, and James C. Thompson, MD, FACS

Molecular Mechanisms of Intestinal Adaptation After Resection 130
B. Mark Evers, MD, D. Chung, MD, Courtney M. Townsend, Jr., MD, FACS, and James C. Thompson, MD, FACS

Stimulative Effects of Somatostatin Analogue (Octreotide) on Cell Proliferation in Rat Insulinoma, RIN m5F, Cells 133
Michael K. McLeod, MD, FACS, Atsushi Fukuuchi, MD, Mark Warnock, BS, Angela M. Tutera, BS, and Arthur I. Vinik, MD, FACP

Somatostatin Analogue Inhibits Intestinal Regeneration 135
Bao-Lien T. Nguyen, MD, Jon S. Thompson, MD, FACS, and Richard F. Harty, MD

Ileal Oleate Inhibits Fasting Intestinal Motility and Increases Circulating Peptide YY and Enteroglucagon 138
Nathaniel J. Soper, MD, Zeev Dreznik, MD, Thomas A. Meininger, Jeffrey A. Barteau, MD, and Debra Brocksmith, BS

Effect of Hydration on the Proabsorptive Response to an Orally or Jejunally Administered Meal 140
Charles J. Yeo, MD, FACS, Gary J. Anthone, MD, Zachary V. Mavrophilipos, MD, Bernadette H. Wang, BS, Marlene S. Orandle, BA, and Michael J. Zinner, MD, FACS

Characterization of Amylin Receptors and Second Messengers in Human Hepatocytes: Effects on Hepatic Glucose Uptake 142
Ambikaipakan Balasubramaniam, PhD, Sulaiman Sheriff, PhD, William T. Chance, PhD, and Josef E. Fischer, MD, FACS

Somatostatin Analogue Inhibits Hepatic Regeneration in the Rat 144
Raj S. Pruthi, BS, BA, Marwan Farouk, MB, ChB, FRCS(Edin),
George K. Michalopoulos, MD, PhD,
and William C. Meyers, MD, FACS

Effects of Partial Biliary Obstruction on Hepatic Function 148
Gary C. Vitale, MD, FACS, and Yong Siow, PhD

Regulation of Alpha Fetoprotein and Albumin mRNA Levels by
TGFβ1 150
R. Daniel Beauchamp, MD, Tawfiq Alam, BS,
Hong-Miao Sheng, MD, Courtney M. Townsend, Jr., MD, FACS,
and John Papaconstantinou, PhD

Preoperative Fasting Improves Survival After 90% Hepatectomy 153
Timur P. Sarac, MD, Harry C. Sax, MD, Ralph Doerr, MD, FACS,
Umit Yuksel, PhD, Ronald Pulli, MD,
and Joseph Caruana, MD, FACS

The Appearance and Characterization of the Intrahepatic Secretin
Receptor Following Common Bile Duct Ligation in the Rat 156
Marwan Farouk, MD, ChB, FRCS(Edin), Raj S. Pruthi, BA, BS,
Justin G. Geoghegan, MB, FRCS(I), Steven R. Vigna, PhD, and
William Meyers, MD, FACS

Characterization of TGFβ1 Receptor on Human Pancreatic Carcinoid
Cells 159
Jin Ishizuka, MD, Robert D. Beauchamp, MD,
Courtney M. Townsend, Jr., MD, FACS, and
James C. Thompson, MD, FACS

Adrenergic Blockade Does Not Prevent Peptide YY-Induced Inhibition
of Pancreatic Exocrine Secretion 161
Robert J. Brodish, MD, Boris W. Kuvshinoff, MD,
David W. McFadden, MD, FACS, and Aaron S. Fink, MD, FACS

Inhibition of Exocrine Pancreatic Function by Galanin via Interaction with Intrapancreatic Neurons 163
Kenneth M. Flowe, MD, Kathleen M. Lally, MS, and Michael W. Mulholland, MD, PhD

Paracrine Regulation of Islet Cell Secretion in the Isolated Perfused Human Pancreas 165
F. Charles Brunicardi, MD, Philip C. Watt, MD, John Colonna, MD, Hugh Gelabert, MD, Abraham Shaked, MD, and Ronald Gingerich, PhD

Mechanism of Pancreatic Growth After Distal Small Bowel Resection 167
Keigo Yoshinaga, MD, Guillermo Gomez, MD, Masaki Izukura, MD, Jin Ishizuka, MD, Courtney M. Townsend, Jr., MD, FACS, and James C. Thompson, MD, FACS

Characterization of a New Model for Acute Alcoholic Pancreatitis 169
Isto H. Nordback, MD, Vaddappuram Chacko, PhD, Jean L. Olson, MD, and John L. Cameron, MD, FACS

Gastric Acid Secretion and Its Effects on Bitamin B_{12} Absorption After Roux-en-Y Gastric Bypass 171
C. Daniel Smith, MD, Sharon M. Herkes, PhD, Virgil F. Fairbanks, MD, and Michael G. Sarr, MD

Healing of Experimental Gastritis by Oral Fibroblast Growth Factor 174
Mark Stovroff, MD, Peter Vattay, MD, Bradley Marino, Sandor Szabo, MD, PhD, and Judah Folkman, MD

A Relationship Between Insulin and Entero-Oxyntin 176
Eric Y.T. Yang, MD, Mitsuru Umezawa, MD, and David L. Nahrwold, MD, FACS

Evaluation of Proximal Gastric Vagotomy by Cobaltous Chloride ($CoCl_2$) Chemoneurolysis in a Rat Model 177
Thomas A. Schneider II, MD, Steven D. Fitzgerald, MD, Marie O. LaRegina, DVM, Charles H. Andrus, MD, and Donald L. Kaminski, MD, FACS

Regulation of Membrane Potentials in Gastric Surface Epithelium: Dependence on Serosal K^+ 180
David I. Soybel, MD, and Laurence Y. Cheung, MD, FACS

Do Capsaicin-Sensitive Neurons in the Gastric Mucosa Mediate Adaptive Cytoprotection (AC) by Increasing Endogenous Prostaglandins? 182
David W. Mercer, MD, Theodore Sullivan, MD, Richard Milner, BS, Wallace P. Ritchie, Jr., MD, PhD, FACS, and Daniel T. Dempsey, MD, FACS

Ethanol-Induced Gastric Vasodilation Is Mediated by Adenosine 184
Michael P. Darnell, MD, John G. Wood, PhD, and Laurence Y. Cheung, MD, FACS

Lovastatin Dissolves Cholesterol Gallstones in the Prairie Dog 186
Kimberly Saunders-Kirkwood, MD, Joe Cates, MD, Mohammad Abedin, PhD, Warren Howard, BA, and Joel Roslyn, MD, FACS

Gallbladder Bile Composition in Crohn's Disease 188
Lillian Dawes, MD, Steven Stryker, MD, FACS, Robert Rege, MD, FACS, and David Nahrwold, MD, FACS

Are Vesicles Required for Nucleation of Cholesterol Monohydrate Crystals? 190
Steven A. Ahrendt, MD, Karen Fox-Talbot, BA, Howard S. Kaufman, MD, Pamela A. Lipsett, MD, Keith D. Lillemoe, MD, FACS, and Henry A. Pitt, MD, FACS

Calcitonin Gene-Related Peptide Inhibits In Vitro Opossum Sphincter of Oddi Contractility 193
José E. Parodi, MD, Susan A. Wyoral, BSA, Ray E. Gleason, PhD, Daniel K. Nelson, MS, and James M. Becker, MD, FACS

Chapter V—Cardiothoracic Surgery

The Site of Increased Placental Vascular Resistance Caused by Fetal Cardiopulmonary Bypass in Sheep 196
Scott M. Bradley, MD, Frank L. Hanley, MD, Russell W. Jennings, MD, Brian W. Duncan, MD, Judith A. Jester, MS, and Edward D. Verrier, MD

Prolonged Prearrest Cooling Contracture of the Newborn Myocardium 198
Dominique Shum-Tim, MD, Teanoosh Hosseinzadeh, MD, Ray C.-J. Chiu, MD, FACS, FRCSC, and Christo I. Tchervenkov, MD, FRCSC

Effect of a Systemic-Pulmonary Artery Shunt on Myocardial Function and Perfusion in a Piglet Model 200
Shigeaki Ohtake, MD, James R. Mault, MD, Mary K. Lilly, BA, R. Eric Lilly, BS, Frank H. Hern, MD, William J. Greeley, MD, and Ross M. Ungerleider, MD, FACS

Autonomic Vascular Reactivity of Intrathoracic Autologous Arterial Vein Grafts: Comparison with Peripheral Grafts 203
Jeff B. Dattilo, BS, Robert M. Lust, PhD, Quan Mei Deng, MD, You Su Sun, MD, Carol A. Moore, MD, and W. Randolph Chitwood, Jr., MD, FACS

Endothelium-Dependent Coronary Vasoreactivity is Attenuated in Severe Left Ventricular Hypertrophy 205
Robert M. Lust, PhD, Chunguang Li, MD, and W. Randolph Chitwood, Jr., MD, FACS

On-Line Quantitation of Myocardial Perfusion Before and After Coronary Artery Bypass Grafting Using Myocardial Contrast Echocardiography 208
Flordeliza S. Villaneuva, MD, Sanjiv Kaul, MD, FACC, Ananda R. Jayaweera, PhD, Jiri Sklenar, PhD, John Dent, MD, Lawrence W. Gimple, MD, FACC, David A. Wyatt, MD, and William D. Spotnitz, MD, FACC, FACS

Evaluation of Coronary Artery Bypass Grafting with Perfusion Contrast Echocardiography 210
Scott H. Johnson, MD, Suad Ismail, MD, Hidetoshi Utsunomiya, MD, Joseph A. Kisslo, MD, and Peter K. Smith, MD, FACS

Reversible Inhibition of Endothelial Leukocyte Adhesion Molecule-1 (ELAM-1) Expression in Hypothermic Endothelial Cells 213
Terri L. Haddix, MD, Kevin F. Montgomery, MD, Timothy H. Pohlman, MD, and Edward D. Verrier, MD, FACS

Experimental Assessment of Hepatic Perfusion in Circulatory Failure: Influences of Low Cardiac Output and High Venous Pressure 216
Hiroshi Takano, MD, Susumu Nakano, MD, Ryota Shirakura, MD, Mitsunori Kaneko, MD, and Hikaru Matsuda, MD

Mathematical Solid Modeling of In Vivo Human Biventricular Geometry 218
John S. Pirolo, MD, Lawrence L. Creswell, MD, William H. Perman, PhD, Michael W. Vannier, MD, and Michael K. Pasque, MD, FACS

Repair of Anteroapical Left Ventrical Aneurysm: Influence of Changes in Regional End-Systolic Elastance on Global Function 221
Edward B. Savage, MD, Stephen W. Downing, MD, and George S. Tyson, MD

Myocardial Oxygen Consumption During Administration of Esmolol and Celiprolol 224
William E. Curtis, MD, Peter S. Greene, MD, A. Marc Gillinov, MD, Joseph M. DiNatale, BS, and Timothy J. Gardner, MD, FACS

Recovery of Myocardial Oxygen Utilization and Functional Performance After Global Ischemia in Canine Hearts 226
Jau-Chang Chang, MD, Susumu Nakano, MD, Ryota Shirakura, MD, Keishi Kadoba, MD, Mitsunori Kaneko, MD, Yuji Miyamoto, MD, Nobuo Sakagoshi, MD, Norihide Fukushima, MD, and Hikaru Matsuda, MD

Improved Endothelial Preservation with Blood Cardioplegia 228
Barry B. K. Chan, MD, John A. Kern, MD, Terry L. Flanagan, MPH, Charles E. Hobson, MD, Irving L. Kron, MD, FACS, and Curtis G. Tribble, MD, FACS

Warm vs. Cold Blood Cardioplegia: Is There a Difference? 231
Hiroshi Matsuura, MD, Harold L. Lazar, MD, FACS, Ximing Yang, MD, Samuel Rivers, BS, Patrick Treanor, CCP, Sheilah Bernard, MD, and Richard J. Shemin, MD, FACS

Antegrade Warm Continuous Blood Cardioplegia Exacerbates Acute Regional Ischemic Injury 232
Bruce D. Misare, MD, Irvin B. Krukenkamp, MD, Zane P. Lazer, and Sidney Levitsky, MD, FACS

Cardioplegic Perfusion Through the Aortic Root with Intermittent Coronary Sinus Occlusion 234
Xinping Fu, MD, Kaileng Zhang, MD, and Shiduo Ye, MD

Comparison of Normothermic vs. Hypothermic Cardioplegia in Patients Undergoing Coronary Artery Bypass Grafting 237
John A. Rousou, MD, FACS, Richard M. Engelman, MD, FACS, Joseph E. Flack III, MD, David W. Deaton, MD, Xuekun Liu, MD, and Dipak K. Das, PhD

Does Cardiac "Preconditioning" Result in Enhanced Postischemic Functional Recovery? 239
Steven F. Bolling, MD, FACS, Douglas C. Olzanski, Keith F. Childs, and Kim P. Gallagher, PhD

Mechanism of Delayed Myocardial Recovery After Repetitive Ischemic Episodes 243
Stanley A. Gall, Jr., MD, George W. Maier, MD, J. William Gaynor, MD, Michael P. Fenely, MD, J. Scott Rankin, MD, and Donald D. Glower, MD

Continuous Measurement of Cytosolic Calcium in the Beating Heart: Response to Myocardial Ischemia 245
Keiji Ataka, MD, David Chen, SB, Harold Feinberg, PhD, Ernesto Jimenez, MD, and Sidney Levitsky, MD, FACS

Pyruvate Improves Postischemic Contractile Function, Energetic Efficiency, and Calcium Regulation 247
K. Eric Sommers, MD, Akihiko Ohkado, MD, Bart Wise, MA, Alan P. Koretsky, PhD, Chien Ho, PhD, and Pedro J. del Nido, MD, FACS

Amino Acid-Enriched Perfluorochemical Cardioplegia Reperfusion Improves Myocardial Recovery After Prolonged Hypothermic Global Ischemia 250
Stephen M. Martin, MD, Darryl G. Stein, MD, Hillel Laks, MD, FACS, Davis C. Drinkwater, MD, FACS, Eli R. Capouya, MD, Stephen W. Barthel, BS, and Paul Chang, BS

Effects of Amrinone vs. Dobutamine on Subsequent Tolerance to Global Myocardia Ischemia 253
Mary T. Amato, MD, Paul J. Hendry, MD, Mark P. Anstadt, MD, Mark D. Plunkett, MD, Jeffrey E. Taber, BA, and James E. Lowe, MD, FACS

Anterior Septal Coronary Artery Occlusion in the Canine: A Model of Ventricular Tachycardia with a Subendocardial Origin 255
James S. Tweddell, MD, Barry H. Branham, MS, Chris K. Rokkas, MD, John S. Pirolo, MD, Richard B. Schuessler, PhD, John P. Boineau, MD, and James L. Cox, MD, FACS

Quantitation of Mapping Error in Wolff-Parkinson-White Syndrome 258
William L. Holman, MD, James K. Kirklin, MD, FACS, and Albert D. Pacifico, MD, FACS

Changes in Myocyte Structure and Basement Membrane Attachment Accompany the Recovery from Supraventricular Tachycardia-Induced Cardiomyopathy 260
James L. Zellner, MD, Francis G. Spinale, PhD, Fred A. Crawford, MD, Kylie M. Martin, and Michael R. Zile, MD

Cerebrospinal Fluid Pressure, Somatosensory and Motor-Evoked Potentials in Spinal Cord Ischemia After Lumbar Artery Ligation ...262
Brent T. Allen, MD, Manuel Doblas, MD, Jeffrey Owen, PhD, Charles B. Anderson, MD, Chris Davis, Gregorio A. Sicard, MD, and Yukihiro Kai, MD

A Primate Model of Spinal Cord Ischemia: Evaluation of Spinal Cord Blood Flow and the Protective Effect of Hypothermia 265
Chris K. Rokkas, MD, Sudhir Sundaresan, MD, Todd A. Shuman, MD, Robert S. Palazzo, MD, George J. Despotis, MD, Thomas H. Wareing, MD, and Nicholas T. Kouchoukos, MD, FACS

Global and Regional Cerebral Reperfusion After Deep Hypothermic Circulatory Arrest 268
Vincent K.H. Tam, MD, Hideo Takahashi, MD, Stewart Finney, MD, Richard Traystman, PhD, and Duke Cameron, MD

Hyperglycemia Exacerbates Cerebral Intracellular Acidosis During Hypothermic Circulatory Arrest and Reperfusion: A ^{31}P NMR Study 270
Richard V. Anderson, MD, Michael G. Siegman, MD, Robert S. Balaban, PhD, Toni L. Ceckler, PhD, and Julie A. Swain, MD, FACS

Barbiturates Impair Cerebral Metabolism During Hypothermic Circulatory Arrest 272
Michael G. Siegman, MD, Richard V. Anderson, MD, Robert S. Balaban, PhD, Toni Ceckler, PhD, Richard E. Clark, MD, FACS, and Julie A. Swain, MD, FACS

Evidence of Cardiac Inflammation After Open Heart Surgery 274
Salwa A. Elgebaly, PhD, Stuart Houser, MD, FACS, Ashraf F. Elkerm, MD, Kathleen Doyle, RN, CCP, Kevin Purlman, BSc, and M.E. Allam, MD

Inhibition of Leukotrienes Improves Global Function, Myocardial Salvage, and Reduces Ventricular Irritability After Acute Regional Ischemia and Surgical Reperfusion 278
C. Chin Lee, MD, Robert F. Appleyard, PhD, Rita G. Laurence, BS, John G. Byrne, MD, and Laurence H. Cohn, MD, FACS

Interleukin-1 Expression and Its Regulation of Oxygen-Free Radical Production in Patients Undergoing Cardiopulmonary Bypass 280
Subhajit Datta, MD, Richard M. Engelman, MD, FACS, Henry Low, MD, FACS, Paul Preissler, MD, FACS, Philip Allmendinger, MD, FACS, Hiroyoshi Takata, MD, FACS, Nilanjana Maulik, PhD, John Rousou, MD, FACS, Devarshi Nath, BS, and Dipak K. Das, PhD

Cardiopulmonary Bypass Is Associated with Early Gut Barrier Dysfunction 282
William G. Jones II, MD, Annabel E. Barber, MD, Thomas J. Fahey III, MD, Karl H. Kreiger, MD, FACS, G. Tom Shires, MD, FACS, and O. Wayne Isom, MD, FACS

Hypoxic Pulmonary Hypertension in the Neonatal Piglet is Related to Decreased Intravascular Endothelium-Derived Nitric Oxide 285
David M. Haybron, MD, MS, Georg F. Matheis, MD, Gerald D. Buckberg, MD, Michael P. Sherman, MD, Russell Byrns, MS, and Louis J. Ignarro, MD

The Detection of an Unique Isoform of Elastin in Human Hypertensive Pulmonary Arteries 287
Michael J. Liptay, MD, Mitchell D. Botney, MD, Robert P. Mecham, PhD, Joel Rosenbloom, MD, PhD, Joel D. Cooper, MD, FACS, and Larry R. Kaiser, MD, FACS

Myocardial Blood Flow Alterations in Response to Intra-Aortic Balloon Counterpulsation in a Canine Hemorrhagic Shock Model 290
Richard P. Cochran, MD, FACS, Jureta W. Horton, PhD, Rodney J. Landreneau, MD, and Edward D. Verrier, MD, FACS

Successful Prolonged Myocardial Preservation with a Highly Buffered Arresting Solution 293
Akihiko Ohkado, MD, K. Eric Sommers, MD, Hung Cao-Danh, PhD, and Pedro J. del Nido, MD, FACS

Systolic Function and Diastolic Mechanics After 12-Hour Cardiac Preservation with University of Wisconsin Solution 295
Thomas A. D'Amico, MD, Theodore C. Koutlas, MD, Cary H. Meyers, MD, Scott A. Buchanan, BA, Hiran Rajasinghe, BS, and Peter Van Trigt, MD

Optimal Osmolality for Cardiac Explant Preservation in University of Wisconsin Solution 297
Suzan A. McGary, MD, Cynthia A. Miller, BS, Walter E. Pae, Jr., MD, FACS, and John A. Waldhausen, MD, FACS

Evidence That Stimulation of Adenosine A_1-Receptors Enhances Preservation of the Cardiac Explant During Long-Term Hypothermic Storage 299
Michael C. Banker, MD, George L. Hicks, MD, FACS, and Tingchung Wang, PhD

The Preservation of Cardiac Function After Brain Death by Dopamine, Naloxone, and Vasopressin 302
Thomas A. D'Amico, MD, Cary H. Meyers, MD, Scott A. Buchanan, BA, Hiran Rajasinghe, BS, Theodore C. Koutlas, MD, and Peter Van Trigt, MD

Relationship Between Regional Myocardial Blood Flow and Unipolar Peak-to-Peak Amplitude During Acute Cardiac Allograft Rejection 304
Todd S. Shuman, MD, John S. Pirolo, MD, Eliazabeth M. Brunt, MD, Michael J. Liptay, MD, James L. Cox, MD, FACS, and T. Bruce Ferguson, Jr., MD

Improved Ventricular Augmentation with Right Latissimus Dorsi Cardiomyoplasty 307
Anthony P. Furnary, MD, James A. Magovern, MD, Ignacio Y. Christlieb, MD, and Dennis R. Trumble, MS

Mechanism of Systolic Augmentation in Dynamic Cardiomyoplasty 310
K. Francis Lee, MD, Cornelius M. Dyke, MD, Rebecca J. Dignan, MD, Gary S. Benton, MD, and Andrew S. Wechsler, MD

Left Ventricular Assistance Improves Mechanical Efficiency of the Right Ventricle 311
Shigeki Morita, MD, Robert L. Kormos, MD, Kiyoyuki Eishi, MD, William A. Marndarino, MS, ME, Thomas Gasior, MD, John M. Armitage, MD, Robert L. Hardesty, MD, and Bartley P. Griffith, MD

Chapter VI—Vascular Surgery

Hemodynamic Effects of Serial Stenoses in an Arterial Model 315
Ian L. Gordon, MD, PhD, Larry J. Goldstein, MD, Christopher M. Ceraldi, MD, Paul D. Weir, MD, Jonathan M. Tobis, MD, and Edward A. Stemmer, MD, FACS

Can Mechanical Stress Cause Fatigue of the Atherosclerotic Plaque? 318
James McKinsey, MD, Barbara N. McCord, MS, Takahira Aoki, PhD, and David N. Ku, MD, PhD

Brief Topical Application of Synthetic Antithrombin Prevents Vascular Graft Thrombosis 320
Alan B. Lumsden, MB, ChB, Harry Kotze, PhD, Stephen R. Hanson, PhD, and Lawrence A. Harker, MD

Hydrophilic Surface Modification of Prosthetic Arterial Grafts 322
Douglas A. Coe, MD, Eugene P. Goldberg, PhD, Ali Yahiaoui, PhD, Drew P. Amery, BS, Nina Klingman, BS, and James M. Seeger, MD, FACS

Modification of High Porosity Polytetrafluoroethylene Vascular Prostheses by Carbon Coating and Fibrin Sealing 324
Hiromitsu Tsuchida, MD, PhD, and Samuel E. Wilson, MD, FACS

Dacron-Induced TGF-β Release from Macrophages: Effects on Graft Healing 326
Dimitri Petsikas, MD, David J. Cziperle, MD, Tina M. Lam, MD, Peter Murchan, MD, Scott C. Henderson, and Howard P. Greisler, MD, FACS

Cellular Components and Immune Response in Abdominal Aortic Aneurysms 328
William H. Pearce, MD, Alisa Koch, MD, G. Kenneth Haines, MD, Chuck Mesh, MD, Dipti Parikh, BS, and James S.T. Yao, MD, PhD

Urokinase and Mannitol Modification of Skeletal Muscle Ischemia-Reperfusion Injury 330
Michael P. Keller, MD, John R. Hoch, MD, and Donald Silver, MD, FACS

Iron Chelation Attenuates Reperfusion-Associated Cellular Membrane Injury in Postischemic Skeletal Muscle 332
Gary A. Fantini, MD, Tomoki Yoshioka, MD, and G. Tom Shires, MD, FACS

Ischemia-Reperfusion Injury of Skeletal Muscle: Prevention of Myocardial Depression by Venous Effluent Hemofiltration 335
Martin L. Howard, MD, Raymond P. Bynoe, MD, Richard M. Bell, MD, FACS, William S. Miles, MD, and Daniel S. Rush, MD, FACS

Distinction of Age Differences in Thrombi by Ultrasonic Tissue Characterization 337
Richard E. Parsons, MD, Robert M. Golub, MD, Issei Kodama, MD, Bernard Sigel, MD, FACS, Ernest J. Feleppa, PhD, Laurie Loiacono, MD, Jeffery Justin, Vanlila K. Swami, MD, Hiroshi Kimitsuki, MD, Mary Rorke, MEE, Mykola M. Yaremko, MEE, and Frederic L. Lizzi, EngScD

Effect of Basic Fibroblast Growth Factor After Intimal Injury 339
Michael A. Parish, MD, Eugene A. Grossi, MD, Tohru Asai, MD, F. Gregory Baumann, PhD, and Aubrey C. Galloway, MD, FACS

Inhibition of Intimal Hyperplasia Using Photodynamic Therapy 340
Paolo Ortu, MD, Glenn M. LaMuraglia, MD, FACS,
W. Gregory Roberts, PhD, Thomas J. Flotte, MD,
Tayyaba Hasan, PhD, and William M. Abbott, MD, FACS

Enhanced Prostacyclin Formation and Inhibition of Intimal Hyperplasia with Dexamethasone Following Balloon Catheter-Induced Aortic Injury 343
Jerry T. Light, MD, M. Parker Roberts, MD,
Morris D. Kerstein, MD, FACS, Philip J. Kadowitz, PhD, and
Dennis B. McNamara, PhD

Effect of Vein Cuff and e-PTFE on the Development of Outflow Intimal Hyperplasia 345
Anton N. Sidawy, MD, FACS, Karim S. Trad, MD,
Mary K. Sidawy, MD, Jack Zeller, MD, Michael Hayyeri, and
Ralph G. DePalma, MD, FACS

The Synergistic Effects of Hypercholesterolemia and Mechanical Injury on Intimal Hyperplasia 347
Scott L. Stevens, MD, Klaus A. Hilgarth, BS, and
Allan D. Callow, MD, PhD, FACS

Suramin Inhibition of Smooth Muscle Cell Proliferation In Vitro and Intimal Hyperplasia In Vivo in a Nonhuman Primate Model of Deep Arterial Injury 351
Denise C. Semashko, MD, Michael R. Cooper, MD,
Charles E. Myers, MD, Stuart A. Aaronson, MD, and
Harry L. Bush, Jr., MD, FACS

A Correlation Between Anastomotic Cholesterol Accumulation and Intimal Hyperplasia in Prosthetic Vascular Grafts 354
Dirk Baumann, MD, Manuel Doblas, MD, Alan Daugherty, PhD,
Gregorio Sicard, MD, FACS, and Gustav Schonfeld, MD

Effects of Immunomodulation by Cyclosporine on Plasma Lipoprotein Levels and Atherosclerosis Development 356
Hector J. Menchaca, MD, Christian T. Campos, MD, Van N. Michalek, BA, and Henry Buchwald, MD, PhD, FACS

Neutrophil Elastase mRNA Transcripts in Abdominal Aortic Aneurysm Patients 358
Jon R. Cohen, MD, FACS, Sandip Parikh, MD, Isaac Sarfati, PhD, and Debra Danna

Protein Kinase C-Mediated Inhibition of Leukocyte Binding to Endothelial Cells Adherent to Vascular Grafts 360
Michael S. Margiotta, MD, Fredika M. Robertson, PhD, Gautam Bijur, BS, and Ralph S. Greco, MD, FACS

Kinetics of Experimental Vein Graft Cell Division and Function 362
Lewis B. Schwartz, MD, Jeffrey C. Pence, MD, Billie-Jo Kerns, MT, J. Dirk Iglehart, MD, Richard L. McCann, MD, and Per-Otto Hagen, PhD

Angiogenic Stimulation: A New Approach for Severe Chronic Limb Ischemia 365
Li-Qun Pu, MD, Kevin J. Lachapelle MD, Alan M. Graham, MD, FRCSC, FACS, Robert Lisbona, MD, Roland Brassard, MD, and James F. Symes, MD, FRCSC, FACS

Chapter VII—Transplantation

Adhesion Molecules in Acute and Chronic Allograft Rejection 368
David Whitley, MD, Masayuki Miyasaka, MD, PhD, Takuya Tamatami, MD, PhD, Michael Christy, BS, and Nicholas Tilney, MD, FACS, FRCS

Inflammation Induced Expression of the VCAM-1 Adhesion Molecule on Murine Cardiac Endothelium 371
Ronald P. Pelletier, MD, Kensuke Miyake, PhD, Paul W. Kincade, PhD, Charles G. Orosz, PhD, and Ronald M. Ferguson, MD, PhD

Immune Response in Hematopoietic Chimeric Rhesus Monkeys 373
Brian W. Duncan, MD, Michael R. Harrison, MD, FACS, Alan W. Flake,* MD, Colin I. A. Bethel, MD, Michael E. Bigler, BS, and Maria-Grazia Roncarolo, MD, PhD

Soluble Antigens vs. Leukocytes for Induction of Immunotolerance 376
Marquis E. Hart, MD, Fei Xiao, MD, Preston F. Foster, MD, Howard N. Sankary, MD, Kent Kociss, CVT, and James W. Williams, MD

Anti-CD4 Monoclonal Antibody for the Induction of Donor-Specific Unresponsiveness to Murine Cardiac Allografts 378
Thomas C. Pearson, MD, Peter J. Morris, PhD, FRCS, FACS(Hon), and Kathryn J. Wood, DPhil

The Differential Effects of CD4 MAB Therapy on Intragraft Expression of IL-2 and IL-4 Genes 380
Ildiko Papp, MD, Tomasz Sablinski, MD, PhD, Keneth J. Weider, PhD, Philip J. O'Connell, MD, PhD, Edgar L. Milford, MD, Terry B. Strom, MD, and Jerzy W. Kupiec-Weglinski, MD, PhD

T Cells Expressing the γ/δ Antigen Receptor Mediate Non-MHC Directed Human Renal Allograft Cytotoxicity 384
Allan D. Kirk, MD, and Olivera J. Finn, PhD

IL-10 (Cytokine Synthesis Inhibitory Factor) mRNA is Detectable by Reverse-Transcription-Polymerase Chain Reaction (RT-PCR) in Sponge Matrix Allografts 386
Stewart C. Wang,† MD, David J. Tweardy, MD, Henri R. Ford, MD, Qi Wang, and Richard L. Simmons, MD, FACS

The Effect of Calcium Sequestration on Hyperacute Rejection and Xenograft Survival 388
Bradley A. Bryan, MD, Mitchell L. Henry, MD, FACS, and Ronald M. Ferguson, MD, PhD, FACS

Timing of Splenectomy is Critical in Prolongation of Cardiac Xenografts 390
Dorian R. Araneda, RTE, Timothy N. Patselas, MD, Francis T. Thomas, MD, and Judith M. Thomas, PhD

Clonal Deletion of Potentially Autoreactive T Cells Proceeds Normally in a Xenogeneic Thymic Environment in Tolerant Chimeras (Mouse → Rat) 393
Suzanne T. Ildstad,* MD, Melanie S. Vacchio, PhD, Peter M. Marcus, MD, Sherry M. Wren, MD, Mary L. Hronakes, BS, and Richard J. Hodes, MD

Effect of Cyclosporine on Renal Microvascular Responses 395
Eric H. Bronstein, MD, Kim U. Kahng, MD, FACS, and Richard B. Wait, MD, PhD, FACS

Prolongation of Islet Allograft Survival with Composite Grafts of Placental-Islet Cells 397
Henry T. Lau, MD, Raymond Chung, BS, and James A. O'Neill, Jr., MD

Chronic Rejection of Renal Allografts in the Rat 398
Harold Yang, MD, PhD, FACS, Jonathan Diamond, MD, Jay McElroy, BS, Jeffrey Frye, BS, Ivona Pesek-Diamond, MD, Haruhiko Ueda, MD, David Whitley, MD, and Nicholas L. Tilney, MD, FACS, FRCS

Succinylacetone Attenuates Rejection of Heterotopic Cardiac Allografts in Miniature Swine 401
Gary L. Parenteau, MD, Richard A. Hess, BS, Eric N. Mendeloff, MD, Richard E. Clark, MD, FACS, and Michael R. Blease, MD

Natural Killer (NK) Cells Damage Islet Allografts in Diabetic BB Rats 403
James F. Markmann, MD, PhD, Mark S. Shachkner, MD, Ali Naji, MD, PhD, FACS, and Clyde F. Barker, MD, FACS

Intermittent Rapamycin Administration Prevents Autoimmune Diabetes 405
Kenneth L. Brayman,* MD, PhD, P. Steven Almond, MD, Adyr Moss, MD, Sally Chen, BS, Raouf Nakhleh, MD, David E. R. Sutherland, MD, PhD, FACS, John S. Najarian, MD, FACS, and Arthur J. Matas, MD, FACS

Reversal of Type II Diabetes in Zucker Rats (ZR) by Xenogeneic Pancreas Islet Transplantation 407
Keith Pittman, BS, Francis T. Thomas, MD, Timothy Patselas, MD, and Judith M. Thomas, PhD

Is an Intravascular Flush Necessary for Organ Preservation? Comparison of Kidney and Pancreas in a Canine Model 410
Edic Stephanian, MD, Seikon Kin, MD, PhD, Ken Shirabe, MD, Brian D. Matteson, BA, Paul Gores, MD, and David E. R. Sutherland, MD, PhD

Effect of Rejection on the Inotropic Response of Isolated Papillary Muscles 412
Robert Pyo, BS, John S. Pirolo, MD, Richard B. Schuessler, PhD, Jeffrey E. Saffitz, MD, PhD, and T. Bruce Ferguson, Jr., MD

Lobar Lung Allografts: Acute Function Studies with an Elevated Native Pulmonary Vascular Resistance 415
John C. Wain, MD, Hon-Chi Suen, MD, Dean M. Donahue, MD, and Daniel P. Ryan, MD

Cytotoxic T Lymphocyte Development Requires IL-2 but Not Antigen Processing 417
P. Stephen Almond, MD, Shuicheng S. Chen, BS, and Arthur J. Matas, MD

Transplantation of Encapsulated Microcarrier-Attached Hepatocytes into Analbuminemic Rats 419
Jacek Rozga, MD, PhD, Teresa M. Bellew, MB, Albert D. Moscioni, PhD, and Achilles A. Demetriou, MD, PhD, FACS

Chapter VIII—Molecular and Tumor Biology, Cellular Immunology, and Cytokines

The *c-SRC* Oncogene Participates in the Development of Human Colorectal Liver Metastases 422
Mark S. Talamonti, MD, Mark S. Roh, MD, FACS, Steven A. Curley, MD, and Gary E. Gallick, PhD

pp60$^{c\text{-}src}$ Activation and Phosphotyrosyl Substrates in Colonic Neoplasia 424
Thomas Weber, MD, Ian Summerhayes, PhD, and Glenn Steele, Jr., MD, PhD

Expression of the *c-fos* Protooncogene, the p53 Anti-Oncogene, and Statin in Colorectal Carcinoma and Adjacent Mucosa 427
Maureen Chung, MD, Benjamin Mitmaker, MD, PhD, FRCSC, Philip H. Gordon, MD, FRCSC, FACS, and Eugenia Wang, PhD

Mapping the Deleted Region of Chromosome 1P in Pheochromocytomas and Medullary Thyroid Cancers 429
Jeffrey F. Moley, MD, Michele B. Brother, BS, Samuel A. Wells, MD, FACS, and Garrett M. Brodeur, MD

Confirmation of Genetic Homogeneity in Multiple Endocrine Neoplasia Type 2A 432
James R. Howe, MD, Terry C. Lairmore, MD, Shenshen Dou, MS, Jennifer A. Korte, Samuel A. Wells, Jr., MD, FACS, and Helen Donis-Keller, PhD

An Epithelial-Mesenchymal Transformation in Response to Extracellular Matrix Leads to Basement Membrane Invasion 435
Darius J. Bägli, MD, CM, and Michael R. Freeman, PhD

Suppression of Tumor Metastasis by Angiogenesis Inhibition 439
Harold Brem, MD, Donald Ingber, MD, PhD, Christine H. Blood, PhD, David Bradley, BS, Sandy Urioste, BS, and Judah Folkman, MD, FACS

Anticatabolic Effect of Cimaterol In Vitro in Tumor-Bearing Animals 441
Anthony Stallion,† MD, Teri Foley-Nelson, PhD, William T. Chance, PhD, and Josef E. Fischer, MD, FACS

Total Parenteral Nutrition with Growth Hormone or Insulin-like Growth Factor-1: Responses in the Tumor-Bearing State 444
Eng-Hen Ng, MD, FRCS(Edin), Craig S. Rock, MD, Arthur S. Hawes, MD, Marc Roth, RPh, Kathy Lee, BS, Lia Staiano-Coico, PhD, Lyle L. Moldawer, PhD, and Stephen F. Lowry, MD, FACS

Targeted Phototherapy with Sensitizer-Monoclonal Antibody and Light 447
Helen W. Pogrebniak, MD, Wilbert Matthews, BS, Christopher Black, PhD, Angelo Russo, MD, PhD, Paul Smith, PhD, Jack A. Roth, MD, FACS, and Harvey I. Pass, MD, FACS

Tumor Multidrug Resistance: An In Vivo Model 449
Mary Cardoza, MD, Benjamin Edwards, PhD, Louise Hom, MD, and Patrick Twomey, MD, FACS

Inhibition of Hepatoma Tissue Culture-4 Cell Growth by Lovastatin: A Novel Chemotherapeutic Strategy 452
Todd J. Morris, MD, Sally L. Palm, PhD, Juan Pena, MD, Leo T. Furcht, MD, and Henry Buchwald, MD, PhD, FACS

Molecular Analysis of Macrophage Infection by HIV-1 454
Terence J. Boyle, MB, BSc, FRCS(I), Stephen S. Hwang, MD, Herbert Chen, BS, Mario Tamburini, MD, Bryan R. Cullen, PhD, and H. Kim Lyerly, MD

Human Hepatic Natural Killer Cells Are Cytotoxic Against Gastrointestinal Malignancies 457
Michael P. Kahky, MD, Mark S. Roh, MD, FACS, Caroline Oyedeji, MS, James M. Reuben, PhD, and Eval Lotzová, PhD

In Vitro Interaction of Human Kupffer Cells with Human Colorectal Carcinoma Cell Lines 460
Sarkis H. Meterissian, MD, MS, FRCSC, Carol Ann Toth, PhD, Peter Thomas, PhD, and Glenn D. Steele, Jr., MD, PhD

Natural Killer Cell Stimulatory Factor Augments Monocyte Tumor Cytotoxicity 462
Michael D. Lieberman, MD, Bice Perussia, MD, H. Paul Redmond, FRCS(I), and John M. Daly, MD, FACS

Acquired Resistance to TNF In Vitro Is Associated with Increased Expression of the Gene for MnSOD but Not for Gene Amplification 464
Mark I. Block, MD, H. Richard Alexander, MD, Carolyn M. Buresh, BS, and Jeffrey A. Norton, MD, FACS

Regression of a Nonimmunogenic Murin Tumor After Retroviral-Mediated Insertion of the IL2 Gene 467
Stephen E. Karp, MD, CM, FRCSC, Jonathan C. Salo, MD, Gitie Jaffe, MD, James J. Mulé, PhD, and Steven A. Rosenberg, MD, PhD, FACS

Retroviral-Mediated Gene Transfer of Interleukin-6 and Interleukin-7 into Human Tumor-Infiltrating Lymphocytes 470
Charles F. Chandler, MD, Michael Skotzko, MS, Jeffrey D. Lee, MD, Kristina Rhoades, BS, Cho Lea Tso, MS, Arie Belldegrun, MD, William McBride, PhD, Donald Kohn, MD, Sidney Golub, PhD, E. Carmack Holmes, MD, FACS, and James S. Economou, MD, PhD, FACS

Interleukin-1 Synergizes with Interleukin-2 in the Generation of Cytotoxic Lymphocytes via a Tumor Necrosis Factor-Mediated Pathway 472
Allen W. Lazenby, MD, Laurie B. Owen-Schaub, PhD, William L. Crump, BS, Elizabeth A. Grimm, PhD, and Jack A. Roth, MD, FACS

Interleukin-2 Augments the Host Response to Tumor Cells in a Murine Model of Specific Active Immunotherapy 475
William M. Ricci, BS, Timothy Darrow, PhD, Carol Vervaert, MT, Zeinab Wahab, PhD, and Hilliard F. Seigler, MD, FACS

Detection of Tumor-Specific CTL Clones from Patients with Renal Cell Carcinoma 477
Yasunori Terashima, MD, PhD, Deric D. Schoof, PhD, Jerome P. Ritchie, MD, FACS, and Timothy J. Eberlein, MD, FACS

Characterization of Lymphocytes Infiltrating Human Breast Carcinomas: Evidence of Specific Immune Reactivity 480
Douglas J. Schwartzentruber, MD, Suzanne L. Topalian, MD, and Steven A. Rosenberg, MD, PhD

Bryostatin Generates T Cells with Antitumor Acitivity 482
Todd M. Tuttle, MD, Carl M. McCrady, PhD, Thomas H. Inge, BS, and Harry D. Bear, MD, PhD

Chapter IX—Gynecology and Obstetrics

Comparative Cardiopulmonary Effects of Helium and Carbon Dioxide Pneumoperitoneum 485
Thomas A. Leighton, MD, Frederic S. Bongard, MD, Se-Yuan Liu, MD, Tai-Shion Lee, MD, and Stanley R. Klein, MD, FACS

A Model of Nonimmune Hydrops in Fetal Lambs: Complete Heart Block Induced Hydrops Fetalis 487
Timothy M. Crombleholme, MD, Hirohiko Shiraishi, MD, N. Scott Adzick,* MD, Jonathan Langberg, MD, Norman Silverman, MD, and Michael R. Harrison, MD, FACS

First-Trimester Transvaginal Chorionic Villus Sampling 489
Lee P. Shulman, MD, Sherman Elias, MD, FACS, Carole M. Meyers, MD, Owen P. Phillips, MD, Donald S. Emerson, MD, Richard E. Felker, MD, and Joe Leigh Simpson, MD

Serum Progesterone Determinations in Early Ectopic Gestations 493
Franky Voss, MD, Jaroslav Stern, MD, and Carolyn Coulam, MD

Reperitonealization of the Vesico-Uterine Fold at Cesarean Section: A Prospective, Randomized Study 495
Scott Smilen, MD, Julia Roshkow, MD, and Iffath A. Hoskins, MD, FACS

Successful Primary Management of Perineal Neoplasias with Local Flaps and Without Colostomy 497
Desmond P. J. Barton, FRCS(Ed), MRCOG, Mitchel S. Hoffman, MD, William S. Roberts, MD, James V. Fiorica, MD, James P. LaPolla, MD, Michael A. Finan, MD, and Denis Cavanagh, MD

Clinical Utility of Midluteal Phase Progesterone Levels 499
Linda Bresnahan, MD, Jaroslav Stern, MD, and Carolyn Coulam, MD

Breast Cancer in Women 30 Years of Age or Younger: Trends in Stage at Presentation, Therapy, and Outcome 501
John T. Vetto, MD, Alberto Luna Vega, MD, Catherine G. Lee, MD, James W. Smith, MD, Beryl McCormick, MD, and David W. Kinne, MD

Chapter X—Neurologic Surgery

Reduction of Postlaminectomy Scar Tissue 503
John L. Hinton, Jr., MD, Mac Molnar, MD, Paul A. Lucas, PhD, Roger E. McLendon, MD, Cato Laurencen, MD, and Joe Sam Robinson, Jr., MD, FACS

Percutaneous Manual Lumbar Discectomy in 41 Patients: An Alternative to Automated Lumbar Discectomy 505
Richard D. Fessler, MD, Robert E.M. Ho, MD, and Fernando G. Diaz, MD, PhD

Laser Discectomy: Comparison of HO:YAG and ND:YAG Systems 507
Matthew R. Quigley, MD, Tommy Shih, MD, Amr Elrifai, MD, Dan Loesch, MD, Kenora Smith, BS, Michael Lesiecki, PhD, and Joseph C. Maroon, MD

Spinal Cord Blood Flow and Evoked Potential Responses to Nimodipine or Methylprednisolone in Spinal Cord Injured Rats 509
Ian B. Ross, MD, and Charles H. Tator, MD, PhD, FACS, FRCSC

Methylprednisolone: Therapeutic Time Window in Experimental Spinal Cord Injury in Rats 512
Daniel F. Kelly, MD, Jerald J. Bernstein, PhD, and Edward R. Laws, Jr., MD, FACS

Transcranial Motor-Evoked Potentials 514
George H. Raque, MD, Christopher B. Shields, MD, FRCSC, R. Dean Linden, PhD, Y. Ping Zhang, MD, John R. Johnson, MD, and Jesse Babbitz

Selective Uptake of Perivascular Heparin by Smooth Muscle Cell Nuclei After Endothelial Injury 516
Marc R. Mayberg, MD

The Lifespan of Intraperitoneal Fibran Sealant: The Effects of Three Antifibrinolytic Agents 519
Catherine M. Pipan, MD, William P. Glasheen, PhD, Steven L. Gonias, MD, PhD, John A. Jane, MD, PhD, FACS, and William D. Spotnitz, MD, FACS

Isotonic Saline Solution Causes Brain Edema Within Two Hours of Cold Injury in Dogs 521
Wayne L. Wittenberg, MD, PhD, Laurie G. Munro, BA, and Glenn W. Kindt, MD

Colloid Infusion After Brain Injury: Effect on Intracranial Pressure, Cerebral Blood Flow and Oxygen Delivery 523
Jing Zhuang, MD, Joseph D. Schmoker, MD, and Steven R. Shackford, MD, FACS

Insufficient Patient Humoral Response to Glioma-Associated Antigen(s) Identified by Immunofluorescence, RIA, and Immunoblots Using Polyclonal and Monoclonal Reagents 525
Duncan K. Fischer,† MD, PhD, Fatma Shaban, MS, Mohamed Salah-Abaza, PhD, Masafumi Matsuda, MD, Raj K. Narayan, MD, FACS, and M. Zouhair Atassi, PhD

Chapter XI—Ophthalmology

Nd:YAG Laser Cyclophotocoagulation in Pseudophakic and Aphakic Eyes 530
Ghada A. Orkubi, MD, and L. Frank Cashwell, Jr., MD

Chapter XII—Orthopaedic Surgery

In Vitro Joint Model Expresses Epidermal Growth Factor 533
Anthony C. Sank, MD, David E. Halpern, MD, Celia Ma, Randolph Sherman, MD, FACS, and Harold C. Slavkin, DDS

Transforming Growth Factor-β Stimulates Chondrogenesis in Cultured Embryonic Mesenchymal Cells 535
Scott G. Bowerman, MD, Sheila S. Taylor, BA, Lorna Putnam, BS, Henry E. Young, PhD, and Paul Lucas, PhD

Use of Gelfoam as a Substrate for Osteogenic Cells of Marrow 537
J.H. Shoptaw, Jr., MD, Scott Bowerman, MD, Henry E. Young, PhD, and Paul A. Lucas, PhD

A Histometric and Biomechanical Comparison of Cancellous Autografts and Xenografts in a Beagle Tibial Defect 538
David A. Rosenstein, MD, and Ralph E. Holmes, MD

Evaluation of Strain Injuries in Rabbit Skeletal Muscle with a Single Fiber Model 540
Ashok S. Reddy, BS, Michael K. Reedy, MD, Thomas M. Best, MD, Carmen Lucaveche, Anthony V. Seaber, and William E. Garrett, Jr., MD, PhD

Free Radical Formulation Precedes Thromboxane in Secondary Ischemia 542
Michael F. Angel, MD, Kenneth R. Knight, PhD, Diane Lepore, BS, Paul Abbey, MD, Kathleen Gray, MD, Cary Mellow, FRACS, Raymond F. Morgan, MD, FACS, and Bernard M. O'Brien, MD, CMG, FRACS

Endothelin in Rat Cremaster Microcirculation 545
Long-en Chen, MD, Anthony V. Seaber, and James R. Urbaniak, MD

Tensile Strength of the Anterior and Posterior Horn Attachments of the Menisci 548
Michael E. Berend, BA, Mark H. Henry, BA, Richard R. Glisson, BS, Anthony V. Seaber, and John A. Feagin, Jr., MD, FACS

Treatment of Unicameral Bone Cysts with Methylprednisolone by Single-Needle Technique 550
John A. Michalski, MD, and Gadd, G. Guttmann, MD

Therapy of Sudeck's Syndrome with Glyceroltrinitrate 553
Frank Thomas Keller, MD, and Heinz Edzard Koehnlein, MD

Chapter XIII—Otorhinolaryngology

Long-Term Endotracheal Material Analysis in the Leporine Model ..554
Craighton Chin, MD, Eric A. Mair, MD, Kevin P. Lally, MD, FACS, and David S. Parsons, MD, FAAP, FACS

Mucosal Healing After Patch Tracheoplasty 556
Ashok Shaha, MD, FACS, Terry DiMaio, MD, and Bernard M. Jaffe, MD, FACS

The Influence of Bony Architecture on Membranous Bone Graft Survival 558
Jeffrey A. Goldstein, MD, Carol A. Mase, DVM, and M. Haskell Newman, MD, FACS

Free Radical Production in Delayed Skin Flap: Possible Explanation for "Delay Phenomenon" 560
Prakash Mullick, MD, PhD, Sai S. Ramasastry, MD, Stan J. Monstrey, MD, Krishna Narayanan, MD, Robert E. Basford, PhD, and J. William Futrell, MD, FACS

Xanthine Oxidase Activity and Oxy-Radicals in Human Free Jejunal Flaps After Head and Neck Operation 562
Edwin G. Wilkins, MD, Del Smith, MD, Belinda Cashmer, MS, Riley S. Rees, MD, and David J. Smith, MD

Xanthine Oxidase Activity: A Trigger for Tissue Injury in Ischemic Skin 566
Del Smith, MD, Riley Rees, MD, Belinda Cashmer, MS, Becky Crawford, BS, Teidong Li, MD, and David J. Smith, Jr., MD

Critical Ischemic Time in Secondary Venous Obstruction 568
Michael J. Biavati, MD, Michael F. Angel, MD, Kenneth R. Knight, PhD, Cary G. Mellow, MD, ChB, Raymond F. Morgan, MD, FACS, and Robert Cantrell, MD, FACS

Dextran Enhances Flap Survival in a Microvascular Thrombotic Rabbit Model 570
Sean Wolford, MD, Michael F. Angel, MD, Kenneth R. Knight, PhD, Raymond F. Morgan, MD, FACS, and Robert Cantrell, MD, FACS

Chapter XIV—Pediatric Surgery

Transamniotic Fetal Feeding: Enhancement of Growth in a Rabbit Model of Intrauterine Growth Retardation 573
Terry L. Buchmiller, MD, Chong S. Kim, MD, H. Leon Chopourian, and Eric W. Fonkalsrud, MD

Fetal Intraosseous Access: A New Approach to Gain Access to the Fetal Circulation During Fetal Surgery 575
Russell W. Jennings, MD, N. Scott Adzick,* MD, Michael T. Longaker, MD, H. Peter Lorenz, MD, James M. Estes, MD, and Michael R. Harrison, MD, FACS

Growth, Myoelectric Function, and Enzymatic Activity of Fetal Intestinal Transplants Placed in Continuity with Normal Bowel 577
Inder K. Seekri, MD, Frederick J. Rescorla, MD, Schmuel Katz, MD, Dennis W. Vane, MD, FACS, and Jay L. Grosfeld, MD, FACS

Treatments for Short Bowel Syndrome 579
David L. Sigalet, MD, PhD, FRCSC, Gordon M. Lees, MD, FRCSC, Frank X. Aherne, PhD, John E.E. Van Aerde, MD, FRCPC, Richard N. Fedorak, MD, FRCPC, and Alan B.R. Thomson, MD, PhD, FRCPC, FACP

Delayed Bile Duct Proliferation in Newborn Cholestatic Liver Injury: Correlations Between Morphology and Liver Gene Expression 582
Thomas F. Tracy, Jr., MS, MD, Mary E. Goerke, BA, Cirilo Sotelo, MD, and Thomas R. Weber, MD, FACS

Mechanism of Class I Enhanced Allograft Survival 584
Ron Bilik, MD, MSc, Riccardo A. Superina, MD, FRCSC, FACS, Sue Fleming, and Deborah Marshall, BSc

Naive Host Type Splenocytes Abrogate the Donor-Specific Transplantation Tolerance Associated with Mixed Chimerism 587
Sherry M. Wren, MD, Mary Lynn Hronakes, BS, and Suzanne T. Ildstad,* MD

Splenosis in Immunodeficient Mice 589
Nicholas C. Saenz,* MD, Deric D. Schoof, PhD, Timothy J. Eberlein, MD, FACS, and Judah Folkman, MD, FACS

Evidence for Autocrine Growth Regulation by Vasoactive Intestinal Peptide in Cultured Human Neuroblastoma Cells 593
Jeffrey C. Pence, MD, and Nicholas A. Shorter, MD, FACS

Effect of Platelet-Activating Factor on Small Bowel Ischemia/ Reperfusion Injury 595
Mark F. Brown, MD, Andre Hebra, MD, Kathleen McGeehin, BS, and Arthur J. Ross III, MD, FACS

Chapter XV—Plastic Surgery/Wound Healing

Isolation and Growth of Human Preadipocytes In Vitro and Their Potential for Growth when Transplanted In Vivo 599
Joseph J. Disa, MD, Nadine B. Semer, MD, Sheri Slezak, MD, and Nelson H. Goldberg, MD, FACS

Muscle Preservation in Peripheral Nerve Injury Using Continuous Implantable Electrical Stimulation 601
Daniel S. Thomas, MD, H. Bruce Williams, MD, FACS, FRCSC, and John O. Lough, MD, FRCPC

The Role of the Cranial Base in Facial Growth: Experimental Craniofacial Synostosis in the Rabbit 603
Randal Haworth, MD, Paul Rosenberg, MD, Linda Heier, MD, Steven Fiamengo, MD, Lloyd Hoffman, MD, FACS, and Gregory La Trenta, MD, FACS

The Effects of a Single Intraoperative Immersion in Various Chemical Agents and Electromagnetic Field Exposure on Onlay Bone Grafts to the Facial Skeleton 605
Isaac L. Wornom III, MD, and John T. Ning, PhD, FAIC

A Nonprosthetic Mucosa-Lined Fistula for Restoration of Speech Following Laryngectomy 607
Laurie Ann Cleland, MD, Greg L. Combs, MD, Thomas A. Baldwin, MD, Truman M. Sasaki, MD, Toby R. Meltzer, MD, and Alan E. Seyfer, MD

Increased Type 1 Collagen Synthesis in Keloids Results from Alterations in Both the Pre- and Posttranscriptional Regulation of Gene Expression 610
David W. Friedman, MD, Charles D. Boyd, PhD, James W. Mackenzie, MD, FACS, and Susan B. Deak, PhD

A Model of Human Keloid Using the Nude (Athymic) Rat 612
Peter G. Hayward, MBBS, FRACS, Hugo A. Linares, MD, Michael J. Evans, PhD, Robert L. McCauley, MD, and Martin C. Robson, MD, FACS

Inhibition of Neutrophils (PMNs) Attenuates the Extension of Tissue Destruction After Thermal Injury 614
David Borgstrom, MD, William Mileski, MD, Susan Hurst, BS, Ellis Lightfoot, BS, Robert Rothlein, PhD, Robert Faanes, PhD, Peter Lipsky, MD, and Charles Baxter, MD, FACS

Acute Skin Injury Releases Neutrophil Chemoattractants 617
Warren L. Garner, MD, Jorge L. Rodriguez, MD, Cathy Miller, BS, David J. Smith, MD, and D.R. Remick, MD

Inhibition of Neutrophil Adherence Improves Survival of Random Flaps in Rabbits 619
Nicholas B. Vedder, MD, Louis P. Bucky, MD, Ignacio Lopez, and James W. May, Jr., MD, FACS

Free Radical Toxicity and Hyperbaric Oxygen (HBO) Therapy 621
Stan J. Monstrey, MD, Prakash Mullick, MD, PhD, Sai S. Ramasastry, MD, Krishna Narayanan, MD, Robert E. Basford, PhD, and J. William Futrell, MD, FACS

EGF-like Growth Factor Present in Porcine Wound Fluid 623
Karl Breuing, MD, Moshe Marikovsky, PhD, Michael Klagsbrun, PhD, Paul Y. Liu, MD, Thomas Binder, BA, Don R. Miller, PhD, and Elof Eriksson, MD, FACS

The Response of Dermal Fibroblasts to Tissue Expansion-like Strain 625
W. Thomas Lawrence, MD, FACS, Hongliang Yin, MD, and Albert J. Banes, PhD

Cytoprotection of Human Dermal Fibroblasts Against Topical Antimicrobial Agents Using Recombinant Growth Factors 627
Robert L. McCauley, MD, Ying-Yue Li, MD, Vimla Chopra, PhD, David N. Herndon, MD, FACS, and Martin C. Robson, MD, FACS

Cultured Human Amnion Cells Produce Basic Fibroblast Growth Factor and Hepatocyte Growth Factor 630
Karen M. Yokoo, MD, Ruth Halaban, PhD, David M. Young, MD, and Charles B. Cuono, MD, PhD, FACS

Basic Fibroblast Growth Factor Induces Angiogenesis in Ischemic Tissue 632
Michael K. Kim, MD, Lazarre Ogden, BS, John H. Barker, MD, PhD, Gary L. Anderson, PhD, Stuart F. White, BE, Eberhard Uhl, MD, Markus Kamler, and Gordon R. Tobin, MD, FACS

Macrophage-Stimulated Angiogenic Activity Is Mediated by ADP-Ribosylation Mechanisms 635
John J. Feng, M. Zamirul Hussain, PhD, and Thomas K. Hunt, MD, FACS

Wound-Healing Assessment: Influence of Location of Subcutaneous Expanded Polytetrafluoroethylene (ePTFE) Tubes 637
Marie Ange-Tardieu, MD, Khalid B. Ali, MD, FRCS, Eutiquio Teh, BS, ChE, Harry M. Delany, MD, FACS, and Stanley M. Levenson, MD, FACS

Insulin-like Growth Factor-II and Platelet-Derived Growth Factor Act Syngergistically to Improve Wound Healing in Diabetic Mice 640
Robert P. Hummel III, MD, and David G. Greenhalgh, MD

Time Course of Epidermal Growth Factor MRNA Expression in Healing Wounds Using Polymerase Chain Reaction 643
Madeline H. Gartner, MD, Jon D. Benson, BS, and Michael D. Caldwell, MD, PhD, FACS

Immunocytochemistry of Skeletal Muscle Basal Lamina Grafts in Nerve Regeneration 645
David J. Bryan, MD, Robert Miller, MD, Paul Costas, MD, Kai-Kai Wang, MD, and Brooke R. Seckel, MD

Experimental Evidence that Oxidative Stress from Delay Upregulates Antioxidant Defenses in Ischemic Skin 648
Riley Rees, MD, Dan Hinshaw, MD, Belinda Cashmer, MS, Michael Im, PhD, Del Smith, MD, and David J. Smith, Jr., MD

Diabetic Fibroblasts Contract Faster 650
Kay M. Abdullah, MD, Linda G. Phillips, MD, FACS, Fon Huang, MB, Francis Ko, BS, Po Hui, MD, Peter Hayward, MB, BS, FRACS, and Martin C. Robson, MD, FACS

Endogenous Epidermal Growth Factor Expression During Embryonic Mouse Limb Morphogenesis in Serumless, Chemically Defined Medium 652
David E. Halpern, MD, Anthony C. Sank, MD, Lillian Shum, PhD, and Harold C. Slavkin, DDS

Regulation of Fetal Wound Healing 654
Michael T. Longaker, MD, Karyn S. Bouhana, BS, Anita B. Roberts, PhD, Michael R. Harrison, MD, FACS, N. Scott Adzick,* MD, and Michael J. Banda, PhD

Amniotic Fluid Stimulates or Inhibits Fibroblasts, Depending on Gestational Age 656
Basil M. Michaels, MD, Sandra Piscatelli, MD, John W. Siebert, MD, Russell Jennings, MD, Michael T. Longaker, MD, and N. Scott Adzick,* MD

Insulin-like Growth Factor-II Ovine Wound Fluid: Evidence for Developmental Regulation 659
James M. Estes, MD, E. Martin Spencer, MD, PhD, Michael T. Longaker, MD, and N. Scott Adzick,* MD

Rapid Restoration of Breaking Strength in Healing Fetal Rabbit Wounds 661
Frazier W. Frantz, MD, Bruce A. Mast, MD, Robert F. Diegelmann, PhD, and I. Kelman Cohen, MD, FACS

Hyaluronan and Its Associated Protein: Toward Scarless Healing ... 663
Robert M. Freund, MD, Harit G. Garg, MD, Michael T. Longaker, MD, and John W. Siebert, MD

Degradation Products of Hyaluronic Acid Stimulate Angiogenesis in Fetal Rabbit Wounds 666
Bruce A. Mast, MD, Frazier W. Frantz, MD, Robert F. Diegelmann, PhD, Thomas M. Krummel,* MD, FACS, and I. Kelman Cohen, MD, FACS

Fetal Fracture Healing in a Large Animal Model 668
Brent R. W. Moelleken, MD, Michael T. Longaker, MD, Joseph C. Cheng, MD, Russell W. Jennings, MD, David G. Levinsohn, MD, Leonard Gordon, MD, N. Scott Adzick,* MD, Michael R. Harrison, MD, FACS, and David Simmons, PhD

In Vivo Cell Culture Accelerates Reepithelialization 670
Elof Eriksson, MD, FACS, Paul Y. Liu, MD, Yvonne Zeckel, BA, Thomas Binder, BA, Karl Breuing, MD, and Don R. Miller, PhD

The Effects of TGF-β_1 on Fetal Membranous Bone Healing 674
Brian E. Hass, MD, Joseph B. DeLozier III, MD, Scott P. Bartlett, MD, Katrina Conard, MD, and Linton A. Whitaker, MD

Chapter XVI—Urology/Reproductive Biology

DNA Associated with the Sperm Nuclear Annulus Is Specific for That Structure: Repeated 5S RNA Gene as Probe 677
W. Steven Ward, PhD, and Kenneth B. Cummings, MD, FACS

Temperature-Dependent Expression of a 95 kD Protein in Rat Testis 679
Lonny S. Green, MD, William M. Schopperle, BS, William C. DeWolf, MD, FACS, and Abraham Morgentaler, MD

Correlation of Contraction of the Rabbit Corpus Cavernosum with Calcium Movements 682
Robert M. Levin, PhD, Joseph A. Hypolite, and Gregory Broderick, MD

Characterization of Contracting and Relaxing Agents in Rabbit Corpus Cavernosum 686
William W. Kerfoot, MD, Lewis B. Schwartz, MD, Per-Otto Hagen, PhD, Hae Young Park, MD, PhD, and Culley C. Carson, MD, FACS

Renal Ischemia/Reperfusion Injury: Histologic and Molecular Evidence for Apoptotic Cell Death 689
Marc A. Schumer, MD, Ihor S. Sawczuk, MD, Gilbert Wise, MD, Carl A. Olsson, MD, and Ralph Buttyan, PhD

Replacement of Lost Renal Function: Solute Flux and Coupled Urea Nitrogen and Hydrogen Ion Excretion in the Jejunal Reservoir/Urease System 691
Eugene D. Kwon, MD, James F. Donovan, MD, FACS, Harold P. Schedl, MD, PhD, and Richard D. Williams, MD, FACS

Genetic Response of the Rat Bladder During the Onset of Streptozotocin-Induced Diabetic Cystopathy 693
Harry P. Koo, MD, Ralph Buttyan, PhD, Carl A. Olsson, MD, FACS, and Steven A. Kaplan, MD

Biochemical and Morphologic Studies in High and Low Metastatic Variants of Human Prostatic Adenocarcinoma Cell Lines 695
Perinchery Narayan, MD, Beth C. Goldberg, BA, and Rajvir Dahiya, PhD

Benign Prostatic Hyperplasia in a Transgenic Mouse: A Hormonally Responsive Investigatory Model 697
Ronald F. Tutrone, Jr., MD, Robert A. Ball, MD, David M. Ornitz, MD, PhD, Philip Leder, MD, and Jerome P. Ritchie, MD, FACS

The Selection and Phenotypic Characterization of Invasive Variants of Transitional Cell Carcinoma 700
S. Bruce Malkowicz, MD, Barry Kimmel, MD, Alan J. Wein, MD, FACS, and Meenhard Herlyn, DVM, PhD

Bacillus Calmette-Guerin Abrogates In Vitro Invasion of Human Bladder Tumor Cells 703
Richard J. Garden, MD, Brian C.-S. Liu, PhD, S. Mark Redwood, MD, Robert E. Weiss, MD, and Michael J. Droller, MD, FACS

In Vivo Cisplatin and Carboplatin Chemosensitization by Dipyridamole: Differential Impact on Efficacy/Toxicity (Therapeutic Index) Against Human Bladder and Testicular Carcinoma 705
Jeffrey R. Gingrich, MD, Thomas E. Keane, MB, FRCS(I), and Philip J. Walther, MD, PhD, FACS

The Identification of a Urethral Reservoir for Human Papilloma Virus Using the Polymerase Chain Reaction 707
Nora Hansen, MD, Paul Eckrich, MD, Lawrence A. Levine, MD, and Daniel B. Rukstalis, MD
